Introduction

Welcome to Your Realdoll Dildo Careguide.

This presentation outlines all the necessary steps to ensure the long-term performance, safety, and realism of your product.

Pre-wash Instructions

Pre-wash

- Make sure to clean before each use.
- Use Isopropyl Alcohol or hot water and soap.
- Let air dry before use.

After Use Cleaning

After Use

1. Clean thoroughly using either isopropyl alcohol or soap and hot water.
2. Allow the item to dry completely before placing it in storage.
3. If the surface feels tacky, lightly sprinkle it with baby powder or cornstarch to restore its smooth texture.
4. Before the next use, wash again to ensure cleanliness and safety.

Lubricant Guidelines

Water-based Lube Only

1. Always use water-based lubricant.
2. Oils from other lubricants can damage your product.

Vac-U-Lock Care Tips

Vac-U-LockUse

For easy use and reduced chances of damage:

- Lightly dust the Vac-U-Lock plug with baby powder or cornstarch before each use.
- This allows for smoother insertion and removal of your Realdoll Dildo.

To Remove:

- Grip the shaft closest to the base and gently work it off the plug.
- You may need to rock it back and forth slightly to detach it.
- Do not pull the Realdoll Dildo by the base, as this can cause the silicone to tear.

Proper handling will ensure the longevity and performance of your Realdoll Dildo attachment.

Long-term Maintenance

Important

To keep your Realdoll Dildo in optimal condition:

- Gently massage the shaft and testicles every few weeks.
- This helps ensure the silicone skin remains smooth and flexible, and the inner lubrication is evenly dispersed within.
- Regular care helps maintain the lifelike feel and functionality of the product over time.
